

## Dealing With Crosswinds

Crosswind landings are the number one real-world weather related cause of accidents in General Aviation. Paul Dickson has been teaching and training for over 20 years. He has learned how to utilize various resources and a specialized crosswind simulator to help pilots of every level to master crosswind technique.

**Directions:** From US 36 and US 287 (Wadsworth) go south to Interlocken Loop. Turn west to Airport Way and proceed south. Go past the stop sign and watch for the Independence Aviation building on the right.

### A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
